**READY REF**

**The Officials' Standard  
for On-Field Timing**

**Model 1128  
NCAA Football Timer**

- ✓ Allows you to concentrate on your responsibilities without the distraction of checking a wrist watch
- ✓ Gives teams the fairness of timing intervals permitted by rule and develops a nice, even flow to the game
- ✓ Silent vibrator provides discreet notification to pace the hand signals when play clocks are either not available or turned off.

## Operation

---

1. Press the rocker switch to the “○” open circle position. Ready Ref will vibrate for two seconds at 15 seconds then vibrate again for five seconds at 20 seconds..
2. Press the rocker switch to the “●” white dot position. Ready Ref will vibrate for 2 seconds at 30 seconds then vibrate again for 5 seconds at 35 seconds
3. The “Reset” push button resets the timer. Place finger on this button when teams line up and press it at the snap. Ready Ref will then only signal when needed.

## Maintenance

- Start each season with a new battery.
- Protect from direct heavy rain.
- When wet remove battery cover and battery then allow 24 hours to air dry.

**Important:** Every time you reconnect the battery, press the rocker switch to the “○” open circle position, and allow Ready Ref to finish one complete timing cycle thru both vibration signals until the LED cycles off. This will activate the microprocessor’s battery saving feature.

## Delay-of-Game

---

### Hand Signals

When the end zone play clocks are not available or stop operating during the game the official responsible for timing should use the following hand signals.

### NCAA Twenty Five Second Mechanic

Press the rocker switch to “○” for timing the 25-second play clock. At the 15-second vibration raise hand above your head then at the 20-second vibration start a counting motion with the same hand. The vibration signal will last for 5 seconds to help pace the count and alert you of the delay of game when it stops. Press the reset button when the ball is snapped to prepare for ending the down.

### NCAA Forty Second Mechanic

Press the rocker switch to “●” for timing the 40-second play clock. At the 30-second vibration raise hand above your head then at the 35-second vibration start a counting motion with the same hand. The vibration signal will last for 5 seconds to help pace the count and alert you of the delay of game when it stops. Press the reset button when the ball is snapped to prepare for ending the down.

## Time-Out

---

Press the rocker switch to “●” for timing the 60-second time out periods. When Ready Ref signals the 40-second pre-warning vibration the game official responsible for timing should reset Ready Ref and press the rocker switch to “○” and verbally notify the Referee and Wing Officials to give the coach’s warning.

When Ready Ref signals the final 20-second vibration the official should verbally notify the Referee who will give three short blasts with the whistle followed by the ready-for-play signal.
