

Wireless Control System

Easy to operate on-field control provides improved accuracy that assures fair and accurate timing. Transmitters fit securely to the on-field official's belt or can be operated from the scorer's table. The transmitter emits a discrete vibration signal as a reminder that time has expired allowing the user to watch the field, not the clock.

Large 30" 7-Segment LED Display

Bright red LEDs on a black background ensure the digits can be seen both night and day in even the largest stadiums.

Weatherproof Construction

The welded 14-gauge 5052 aluminum case is powder coated and assembled with stainless steel hardware to withstand severe year-round outdoor weather.

One System - Multiple Controllers

This On-Field Clock System can function as a 40/25-second Football Play Clock, an 80/60-second Men's Lacrosse Shot Clock, and a 90/60-second Women's Lacrosse Shot Clock. The system identifies which transmitter is operating and performs accordingly.

Systems & Transmitters

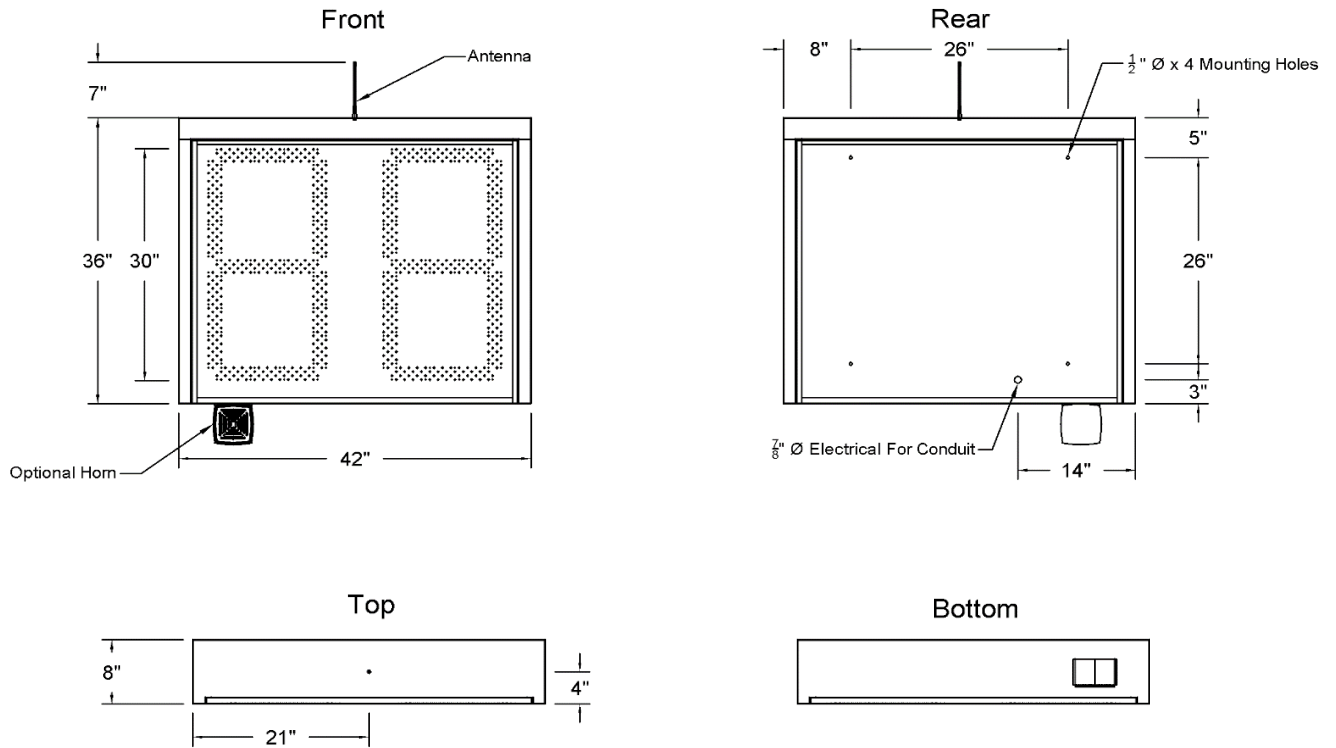

- #1200 On-Field Clock System – 120 VAC

Specifications

Five Year Warranty

The Clock System warranty applies to purchaser and any subsequent owner. Grimm Scientific Industries, Inc. (warrantor) warrants this product to be free from defects in material and workmanship under normal use for five years from the date the product is shipped. The warrantor may opt to replace the product, rather than repair it. This warranty does not cover damage resulting from accidents, improper use, or maintenance of this product, and in no case shall warrantor's liability exceed the original purchase price paid for the product. This warranty is expressly in lieu of all other express warranties.
